BUSHRA SALEEM

Daharki, Pakistan | +92-3347241497

bushramalik.bscs123@iba-suk.edu.pk | GitHub | Portfolio

PROFESSIONAL SUMMARY

Dedicated Computer Science student with strong foundation in full-stack development and machine learning. Proven track record of building scalable web applications with modern technologies including React, Flask, and PostgreSQL. Academic performance in top 5% of cohort with CGPA of 3.81/4.0. Passionate about creating efficient, user-centric solutions and continuously expanding technical expertise through hands-on projects.

EDUCATION

Bachelor of Science in Computer Science(6th sem)

Sukkur IBA University, Sukkur, Pakistan 2023 - Present

CGPA: 3.81/4.0 | Top 5% of Cohort

Intermediate / Higher Secondary School Certificate (HSC)

Sona Public School and College, Mirpur Mathelo 2022

Grade: A1 (84.9%)

TECHNICAL SKILLS

Programming Languages: C++, Java, Python, JavaScript, HTML, CSS

Frameworks & Libraries: Flask, Java Swing, Pandas, NumPy, Scikit-learn, Supabase, Matplotlib

Tools & Platforms: Git, GitHub, Vercel, VS Code, Jupyter Notebook, PostgreSQL

Core Competencies: Data Structures & Algorithms, Object-Oriented Programming, Machine Learning, Database Management Systems, Web Development, Software Engineering, Computer Networks

PROJECTS

Sleep Analysis and Prediction System View on GitHub

Technologies: Python, Flask, HTML, CSS, JavaScript, Scikit-learn, Pandas, NumPy

- Developed comprehensive ML-powered web application that analyzes sleep patterns and predicts sleep quality using regression and classification algorithms with high accuracy
- Designed and implemented Flask-based REST API architecture to serve trained ML models with real-time prediction capabilities
- Performed extensive data preprocessing, feature engineering, and statistical analysis using Pandas and NumPy to improve model performance
- Created responsive, mobile-first user interface ensuring seamless cross-browser compatibility and optimal user experience

Kitab Ghar - Book Lending Platform GitHub | Live Demo

Technologies: HTML, CSS, JavaScript, Supabase (PostgreSQL), Vercel

- Architected full-stack book lending management system featuring user authentication, inventory tracking, and transaction management for streamlined library operations
- Integrated Supabase Backend-as-a-Service with PostgreSQL database for scalable data persistence and row-level security
- Deployed production application on Vercel platform with CI/CD pipeline achieving 99.9% uptime and optimal performance
- Designed modern, accessible interface with responsive layout supporting desktop, tablet, and mobile devices

Calculator Application (2nd Semester)

View on GitHub

Technologies: Java, Java Swing (GUI Framework)

- Developed desktop calculator application using Java Swing with support for arithmetic functions and advanced operations
- Implemented event-driven programming architecture with action listeners for seamless user input processing
- Designed intuitive GUI with custom layouts and comprehensive error handling mechanisms for enhanced user experience

Personal Portfolio Website

Live Demo

Technologies: HTML, CSS, JavaScript

- Developed and deployed personal portfolio website showcasing technical projects, skills, and professional achievements

SCHOLARSHIPS & ACHIEVEMENTS

- **MPCL Scholarship –** Awarded by Mari Petroleum for academic excellence in 2023, recognizing outstanding performance in higher education
- **Sindh Talent Hunt Scholarship –** Ranked as second highest scorer with GPA of 3.78 in foundation semester of 2023, demonstrating exceptional academic aptitude
- **Won Bookreview STHP-2023 –** First place in book review competition conducted by Sindh Talent Hunt Program, showcasing analytical and communication skills
- **Top 5% Academic Standing –** Consistently maintained position in top 5% of Computer Science cohort with current CGPA of 3.81/4.0
